Customer Reviews

(Just to be clear: You will pass the CLEP but NOT ace the CLEP using this book as your primary study material.) I passed the CLEP using just this book and prior knowledge (which admittedly was quite a lot on the subject, so my results may be skewed). It is very important however to know how to use the book properly.

1. Start by reading through, cover to cover. Take note of the glossary in the back of the book, it is an extremely helpful summary/quick reference.
2. Take the diagnostic test. Ignore the diagnostic subject by subject read out nonsense and instead review the test and read the explanations for every answer. This is VERY important. Even if you got a question right you not only need to make sure you understand WHY you got it right but also read the little blurbs about the other answers. This helps tremendously in building context. Spot read about individual topics in the book as needed, but honestly with a few exceptions from early on in the book (in other words, the stuff it had been longer since I had read) the test answer blurbs were far more helpful. They actually offer NEW information over what is in the book many times.
3. Take Practice Test 1, do the same thing. Go over those answers!!!
4. Retake the diagnostic, aiming for a much higher score. Save Practice Test 2 for now. Again, go over the answer blurbs to any question you don't have down.
5. Repeat with Practice Test 1.
6. Now it's time for Practice Test 2. It is important to save this one until after you redo the first two in order to get a clear idea of how you will handle all new questions at this point in your studying. Don't do great? Don't worry, just study the answer blurbs.
7. Every day or so redo the tests, alternating between them as much as possible.
