Customer Reviews

As someone who works as an administrator at a law school how always looking for new guides that will help our students make the transition to law school in general. There are numerous books on

the market that purport to do this, but many lack in various ways some of the fundamental things that I am speaking with prospective students about all the time. This book has many valuable resources held within, and provides the prospective law student a clear perspective of not only what they need to do to get accepted, but even more important what they need to do to be successful in law school. When working with prospective students I am continually running up against individuals who are fearful about this new transition in their life. No matter if they are a high achieving student or student who struggled in the past, most go through many the same developmental stages in this transition. This book lays out systematically in the first chapter what someone must do to be accepted to law school and then in chapters 2 through 10 lays out how the student can be successful in preparing themselves to take the most out of law school and to prepare for passing the bar examination and to be gainfully employed afterwards. I felt the book was easy to read and spoke directly to the reader. I liked many of the practical components within the book with small sections set aside for tips, but also sample resumes and reference letters as well as practical information and that all students should know as they are going to law school themselves. All-in-all this was a great book that shared so much with both prospective and current law students and I would highly recommend it to all.
