The Respiratory Solution contains considerable information on dealing with respiratory ailments using natural medicines. Written by Dr. Cass Ingram, a physician and author, this book provides lots of advice for staying healthy in a world that is largely polluted."There are hundreds of pollutants in city air. The majority of these pollutants arise from vehicular exhaust. Industrial exhaust fouls the air with a host of toxins, including mercury, lead, arsenic, cadmium, beryllium, sulphur dioxide, carbon dioxide, carbon monoxide, dioxins, toxic hydrocarbons, and thousands of others. Jet exhaust is an enormous contributor to air pollution. In cities with international airports the air may be so polluted as to be deemed virtually cancerous." (pages 25, 26)While most people are aware that pollution affects health, they may not be aware of some simple things that can be done to improve health. Dr. Ingram covers subjects such as the importance of deep breathing, sleeping positions and minimizing exposure to chemical pollutants and basement air. Dr. Ingram states that "...relaxed

deep breathing is such a powerful technique that it may by itself result in an immediate improvement in health." (pages 16, 17) Dr. Ingram also says that it is dangerous to breathe through the mouth and that stomach sleeping is the most dangerous position in which to sleep. After providing practical information dealing with breathing, sleeping, pollution, germs, mold, food allergies and the power of spice extracts, Dr. Ingram spends much of the book writing about "Respiratory Illnesses and Their Natural Cures" - everything from actinomycosis to whooping cough and including ailments such as asthma, bronchitis, colds, emphysema, flu, hay fever, pneumonia, sinusitis and smoke inhalation.
