## Customer Reviews

I am a Math Professor, SAT Math tutor, and author of the GET 800 series of SAT prep books (such as "320 SAT Math Problems" and the "28 SAT Math Lessons" series). It is important to do a few practice tests before going into an SAT Subject Test examination, so this book is necessary, but certainly not enough. If you are only taking one or two subject tests, then you're better off buying the books for those subjects separately. As a Math Tutor I will spend the rest of this review commenting on the Math. I have been tutoring SAT Math for over 10 years. When I tutor for the Subject Tests I use The Princeton Review's book in addition to the version of this book that only has math tests. It's

not ideal, but in my opinion The Princeton Review gets closer to College Board questions than other test prep companies. Eventually I plan to write my own strategy book for the SAT Math Subject Tests, but for now I am able to get students into the high 700's to 800 using these 2 sets of materials. Here are a few tips for those of you taking one of the SAT Math Subject Tests:(1) Make sure you take an actual Level 1 and Level 2 test under timed conditions before deciding which one to take. Even though you may feel like you're doing awful on the Level 2 test, your scaled score may come out much higher than you think. The curve is MUCH more generous on the Level 2 test than it is on the Level 1 test.(2) If you are preparing for the SAT, then I recommend taking the Math Subject test the month after you take the SAT. There is some overlap between the Math sections of the regular SAT and the Subject tests. So don't give yourself time to forget all the strategies you've been practicing for the regular SAT.
