Dr Schuessler's Bio-chemic Tissue Salts (Naturopathic Nutritional Medicine Book 5)

Synopsis

An introduction to Dr Schuessler's Bio-chemic tissue salts. Dr. Wilhelm Heinrich Schuessler was one of the outstanding intellects of the 19th century and a man whose scientific vision was far ahead of his time. Dr. Schuessler was a doctor of medicine, a physiological chemist and a physicist. As a practising physician, he was able to put his carefully worked-out theories to the test and the brilliant results he achieved led to the formulation of his unique system of cellular therapeutics, to which he gave his name - Biochemistry. From the Author I was introduced to these bio-chemic tissue salts over 18 years ago when my middle son was suffering with teething problems. Many people went out of their way to recommend the teething formula and one tiny sugar pill popped onto his tongue had a miraculous effect. I then went on to recommend them to everyone who had a teething baby in their family. When I trained in Nutritional Medicine I was reintroduced to these bio-chemic remedies. Recently I found that my muscles were very tired during my weight training so I checked out what I required and within a couple of days I was sorted. I have also found the sinus formula amazing for myself. These remedies work without producing any side effects or healing crisis. About the Author Elizabeth has a great love of books, reading and studying, she produces non-fiction personal growth e books with nineteen so far on offer here. Elizabeth has passionately studied whatever subject has interested her, some to the highest level, and along the way has amassed a huge amount of knowledge and understanding. Elizabeth is a Fellow of The Royal Society of Medicine, Founder member of the BPS Special Group in Coaching Psychology & Graduate Member of the British Psychological Society (BPS). Her qualifications include:- Doctor, Master and Bachelor Of Metaphysical Sciences, BSc Honours Degree in Psychology, Post Graduate Certificate - The Challenge of the Social Sciences, Registered Trauma Specialist, Diploma and Advanced Diploma in Nutritional Medicine, Diploma in Nutritional Therapeutics, Diploma in Nutrition, Diploma in Iridology and Diploma in Herbal Medicine. Elizabeth runs the Festival of Light four times a year in her home town of Weston-super-Mare, Somerset, England where she lives with her grown up sons and greyhounds. Each month she can be found in Glastonbury, Somerset, England, running workshops on many subjects and selling crystals, amulets, symbolic Tibetan silver, colour and healing jewellery.

This Book will open your eyes to the deficiencies you may have in your body that you need to know about! Life saving knowledge that can help you and your love ones! Always check with a Health Provider first...but this book will help you bring your deficiencies to the attention of your Health Provider. Take care of yourself always! Blessings.

Have used this product in the past and loved it then. Just getting started again. It's a simple way to homeopathic, and it works for me! Not harmful. Need to purchase a book or go on line to learn to use it, but you can follow an index of symptoms and treat them. Safe to experiment a little.

I read this in about 5 minutes. It has nothing in it that you can't get online free of charge. The English is non-standard, written by a non-native speaker, or the book just wasn't proofread well. The images aren't formatted right for kindle, so you can't see all the information in the tables. It's really not even worth \$1.

I just recently discovered bio salt while looking for a supplement for my son who was diagnosed with autism. Upon learning about these salt I have starting a new journey for the quest to good health, as I feel that these are the keys missing from common knowledge.

This is the first time I read anything regarding tissue salts. This book serves as a good introductory and has a combination of salts that can be taken for a specific problem. Thank you!

This book has a lot of good information. The contents is easy to understand. I liked it. The book had the answers to the questions I wanted to find an answer to.

Very poor set up Did an adult actually review the lay out and set up of this book I don't recommend this book There are better ones out there
